CHROMA CLEAR MICRODERMABRASION & SKIN REJUVENATION

As we age, the automatic process of exfoliation and cell renewal slows down. Sometimes the body needs a little extra help. Chroma Clear is a gentle abrasion treatment that removes dead cells from the skin surface to reveal fresh, youthful looking skin.

The removal of the dead skin cells triggers the production of new collagen and has a remarkable softening action on surface lines and wrinkles. Chroma Clear treatments combine microdermabrasion with the healing action of light therapy to reduce the signs of ageing and to target skin imperfections such as acne, blemishes, scar tissue, wrinkles and stretch marks.

MICRODERMABRASION

Chroma Clear represents a significant advancement over traditional microdermabrasion treatment methods.

Traditional microdermabrasion typically uses jagged, irregular shaped abrasive crystals to aggressively peel the skin, which can often cause discomfort, redness and irritation. Instead of using aggressive abrasive crystals, Chroma Clear uses perfectly round microspheres, which gently exfoliate by producing a rapid tapping action as they are passed across the skin surface.

Chroma Clear delivers a precision exfoliation that leaves the skin looking softer and more youthful.

**LEAVES THE SKIN
GLOWING, RADIANT
& MORE YOUTHFUL
LOOKING**

MICRODERMABRASION

BEFORE

AFTER

Abrasive microspheres are used to perform a gentle, controlled skin exfoliation. By removing superficial layers of the skin, the complexion is left clearer, smoother and more youthful looking. Results are visible after just one treatment.

ACNE/BLEMISHES

Chroma Clear light therapy delivers specific wavelengths of red and blue light which have a bio-stimulatory and antibacterial action on skin cells.

The combination of light therapy and microdermabrasion encourages tissue repair and healing, and is particularly effective for the treatment of acne, scar tissue, stretch marks and skin blemishes.

HAND TREATMENT

A classic ageing giveaway, our hands are often the tell-tale indicator of our true age. Chroma Clear microdermabrasion removes dry dead skin cells on the hands leaving the skin tissue firm and supple.

Vibration massage of the skin tissue will also help to improve blood flow and circulation, giving the hands a healthy and youthful glow.

SKIN HYDRATION

Hydro Mask is a transparent gel mask with intensive moisturising properties. It is used in conjunction with Chroma Clear light therapy to replenish dehydrated and sun damaged skin. Hydro Mask also has an immediate cooling action that instantly soothes and calms skin redness and irritation.

Hydro Mask's effective anti-ageing ingredients help to smooth and soften the appearance of lines and wrinkles.

Hydro Mask may also be purchased separately for home use. It comes conveniently packaged as a single use product, divided into upper and lower face sections. The mask has a great energising and instant wake up effect when kept refrigerated before use.

VISIBLY SOFTENS LINES & WRINKLES

BEFORE

AFTER

PIGMENTATION / SKIN BLEMISHES

Removing the superficial layers of the skin can help reduce the appearance of pigmentation, uneven skin tone and blemishes. Shedding uneven pigmented skin stimulates cell turnover and the production of new healthy skin cells.

STRETCH MARKS & SCAR TISSUE

Stretch marks and scar tissue can be effectively treated using a combination of microdermabrasion and light therapy. Superficial abrasion of the skin triggers the body's own natural repair mechanism which stimulates the production of new collagen and elastin fibres.

The use of specific wavelengths of red light can help to increase skin tissue repair and cell regeneration. Chroma Clear can have a remarkable softening action on stretch marks and scar tissue.

VACUUM & VIBRATION MASSAGE

Chroma Clear reduces puffiness and improves the appearance of a dull and devitalised complexion by using a combination of vacuum suction and vibration massage to stimulate circulation and blood flow.

- ▶ Improves blood and lymphatic circulation
- ▶ Swelling and puffiness is reduced
- ▶ Improved appearance of skin complexion
